

OGUZHAN OZDEMIR

Mobile Engineer · 5+ Live App Store Apps · Flutter / Swift / Node.js

ozdemiroguzhan55@gmail.com | [+90 545 454 25 32](tel:+905454542532) | ozdemiroguz.github.io | [LinkedIn](#) | [GitHub](#)

Istanbul, Türkiye · Open to Onsite / Hybrid / Relocation

SUMMARY

Mobile & backend developer with 3+ years shipping production Flutter apps to iOS and Android, including 5+ live App Store apps and a 4.7k-review production rebuild that improved startup by ~44%. Strong in scalable architecture, native bridges (Swift / Kotlin), real-time systems, and release ownership across App Store Connect and Google Play. Comfortable across the full mobile delivery lifecycle — from architecture decisions to release rollout and post-launch iteration.

EXPERIENCE

Nodelabs Software

06/2025 — Present

Mobile Engineer (Flutter)

Remote

- Built and optimized production Flutter apps across 10+ projects using Clean Architecture and Bloc.
- Improved app startup by ~44% through state hoisting, asset deferral, and resource optimization.
- Led architectural refactor of a 4.7k+ review production app, modularizing features and stabilizing release quality.
- Shipped real-time voice and video on iOS and Android using VideoSDK with WebSocket-based signaling.
- Accelerated refactoring and test scaffolding using Claude Code and Cursor across legacy Flutter modules.

Iwwomi

01/2025 — 06/2025

Mobile Engineer (Flutter · Node.js)

Istanbul

- Led migration and Bloc-based rewrite of TRHaber — a major news platform reaching thousands of daily users — shipping to App Store and Google Play with improved performance and scalability.
- Built customer- and driver-facing apps for a ride-hailing platform, integrating Stripe payments with idempotent retry handling.
- Built Node.js / Express endpoints powering driver dispatch and ride-state sync between mobile clients.

JuniusTech

03/2024 — 12/2024

Mobile Engineer (Flutter · Node.js)

Freelance

- Shipped a special-needs-focused Flutter (Provider) + Node.js app with REST API integrations.
- Owned mobile feature delivery with product and backend teams, focused on accessibility and clean code.

Freelance & Independent Developer

2023 — Present

Mobile Engineer (Flutter)

Remote

- Delivered production Flutter apps to global Fiverr clients with a 5.0★ rating across mobile delivery work.
- Published consumer apps live on the App Store, earning the first \$1,000+ as indie validation.

- Built Flutter features in a professional product environment using Provider and Clean Architecture.
- Collaborated with senior engineers on shared codebases, code reviews, and release-quality implementation.

SELECTED PROJECTS

Apple Developer Profile — Live App Store Apps | App Store Connect · TestFlight · Release lifecycle

- Own and maintain 5+ live App Store apps with active end-user bases — spanning consumer utility, AI chat, news, live streaming, and ride-hailing.
- Run end-to-end release lifecycle: TestFlight betas, paywall iteration, App Store Connect metadata, and post-launch crash monitoring.

ImageFlow — Real-Time Image Processing Pipeline | Flutter · Swift (Vision) · Kotlin (OpenCV) · Method Channels

- Built a sub-200ms on-device face and document detection pipeline bridging Flutter to native Swift and Kotlin via Method Channels, with no cloud round-trip.

Movie App v2 — Flutter Architecture Showcase | Flutter · REST · Clean Architecture · Bloc

- Open-source Flutter app showcasing Clean Architecture and Bloc patterns over real-world REST APIs — pinned reference project on GitHub.

SoundCare — Speaker Cleaner | Flutter · RevenueCat · AdMob · Firebase Analytics

- Indie utility app on the App Store using sound frequencies to remove water and dust from phone speakers — RevenueCat subscriptions, AdMob, and Firebase Analytics-driven paywall iteration.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter, Swift (integrations), Kotlin (integrations), Node.js, Express.js, JavaScript

State & Architecture: Bloc, Riverpod, Provider, Clean Architecture, MVVM, modular features

Backend & Realtime: REST, WebSocket, VideoSDK, Firebase, MongoDB, Method Channels

Release & Tooling: Xcode, Android Studio, App Store Connect, TestFlight, GitHub Actions, Fastlane, Crashlytics, Sentry, Git

Testing: Unit, Widget, Integration Testing, crash-free session monitoring

AI Tooling: Claude Code, GitHub Copilot, Cursor, Codex, Gravity

EDUCATION

Eskişehir Osmangazi University

2020 — 2025

B.Sc. Computer Engineering

Eskişehir

AWARDS & LANGUAGES

Second Place — GDSC Hackathon '24 — Flutter app integrating Gemini AI + Firebase, 20+ competing teams 09/2024

Languages: Turkish (Native) · English (C1, Advanced) · **Open Source:** 45+ public GitHub repos (Flutter, Dart, Node.js)
